

Media Consolidation benefits no one and only serves the corporations. My family strongly objects to allowing more control of media by even fewer corporations. This regulation must not pass! Rules in place are meant to serve the public interest, and should not be changed to favor private profiteering. We oppose taking a vote that leads to more media consolidation - especially one that does not take the public's opinion under consideration! This rule change was devastating to radio, and you cannot allow any more deregulation in media! Do not submit to the whims of the current administration, and its philosophy that America is run by corporate sponsorship. On June 2nd, We The People urge you to retain the current ownership rules.
